

**Successful Installation at Bernard Matthews**

10<sup>th</sup> July 2015

Mainlight installed a new LED lighting system in our Cold Store installation at Holton in early 2015. This was never going to be an easy win for any contractor to install in such an arduous conditions with limited availability as the unit was still in operation. The installation team identified the best positioning for the lighting and installed the new system in a seamless manor that now exceeds our original expectations.

Identifying and understanding the requirements for the new system was made easy by the installation team leader who quickly grasped the needs of the operatives. I have not had one single negative comment from the operatives working in the store in fact they cannot speak highly enough of it!
